

LOCATION: BLM-25-455

HYDRAULIC CONDITIONS: Apparent confined aquifer; tuff bedrock

PERTINENT OBSERVATIONS: Drilled to 360'. No formation water observed while drilling. Blew hole dry of drilling fluids and measured no water in borehole after overnight recovery. Drilled from 360' to 494' encountered bedrock tuff at 365'. No formation water observed while drilling. Blew hole dry of drilling fluids and measured water level at 364.06' (G.S.) after overnight recovery.
